10 Opportunities for meaningful work and activities

Mehrgenerationenhaus

A Caring Place

Green Infrastructure
Gemeinschafts-Räume, wobei auch der Zugang zu öffentlichen peperkosten in einer Stadtplanung zentrale Bedeutung haben sollte. Es ist wichtig, dass die Infrastruktur für alle Menschen zugänglich ist.

Housing Infrastructure
Integration of housing that is close to the city center, including existing space in buildings in the urban center.

Community Infrastructure
The city is an important place for social interaction and the exchange of ideas. It is important that public spaces are available for everyone.

Transport and Digital Infrastructure
Connecting learn social and digital spaces, which is important for the development of new public transport systems.

Note: The following illustrations were generated by participants of the Caring Place workshop 2018. It is not an official view, but rather a reflection of the initial ideas at A&DS and its partners.
